

Cannock Gates are committed to protecting the environment. All timber used in the manufacture of our products is PEFC certified.

PEFC/16-37-518

Caring for the environment

Every two seconds an area of forest the size of a football pitch is destroyed. Count – one, two. That’s another one gone.

This not only has a devastating impact on the lives of the indigenous people of the forest, countless rare wildlife species and their natural habitats but it adds more to carbon emissions each year than the transport sector.

At Cannock Gates, we do not want to contribute to, or be responsible for any of this desolation. Rather, we work hard to ensure we only use wood that comes from independently third party certified, well managed forests.

We buy wood from sources that are known to us and we know these sources are carefully monitored.

The certification is awarded by the Programme for the Endorsement of Forest Certification scheme which is an independent, international, non-profit, non-governmental organisation, founded in 1999 which promotes sustainably managed forests through independent third party certification. By choosing **PEFC** products you avoid buying wood from destructive forestry and help to ensure forests are protected for the long term while remaining commercially viable.

Cannock Gates customers can rest assured that every purchase you make from us, that bears the **PEFC** logo, has been produced in such a way that it will not damage ancient forests, harm wildlife or jeopardise the future of the people whose lives depend on the forest.
