

Cannock Gates Offers Customers Added Security

7th October 2008...Every 37 seconds a home in Britain is burgled with over one million burglaries and attempted burglaries every year in the UK*. Home security continues to be top on the homeowner's list of priorities, with a high number looking for added security through fitting gates to their property.

Cannock Gates is the UK's largest manufacturer of gates offering the UK's largest range of wooden gates and wrought iron style gates and railings. The extensive range includes garden gates, side gates, drive gates, estate gates and field gates in over 750 standard size/style combinations. A bespoke service is also offered, meaning a style and size of gate can be manufactured to suit each property.

Colin Stead, Managing Director for Cannock Gates, explains: "Adding gates to properties not only offers customers a relatively low cost way to improve the exterior of their home but enhances the security of that property, giving customers additional peace of mind. And, due to the current economic climate, more and more homeowners are turning to DIY projects to improve their property, rather than

burdening themselves with the expense of moving. Investing in a smart new pair of automated gates could also add value to a property.”

Gate automation systems are also available from Cannock Gates, with a choice of above and below ground hydraulic systems and electromechanical systems, some designed for DIY installation.

An installation service is available for gates, railings and automation.

Where extra security is required, Cannock Gates also supply wrought iron style window grilles, security gates for doorways and security locks.

Operating for over 25 years, the Cannock Gates ethos is based upon traditional manufacturing methods and skilled craftsmen.

All Cannock Gates timber products are PEFC certified and are produced in ways which do not damage ancient forests, harm wildlife or jeopardise the future of the people whose lives depend on the forest.
