Secure Your Home As Dark Nights Draw In

Every 37 seconds a home in Britain is burgled with over 1 million burglaries and attempted burglaries every year in the UK.* With the clocks going back this month and the darker evenings starting to creep in, why not look at how you can make your home as safe as houses!

Prevent intruders getting to the front, back and sides of your home by installing strong gates and / or railings such as those manufactured by Cannock Gates. Making it difficult for burglars before they have even got near your property is very likely to deter them!

If the back of a house can be accessed from the front then a high, sturdy and locking gate should be positioned across the access point. This is to prevent burglars from getting to the back of the property where they can operate without being disturbed by passers-by.

Some gates can be fitted with mortise locks during manufacture, or padlocks can be purchased. Automating your gates is another way of controlling who can access your property.

Cannock Gates also supplies wrought iron style window grilles, security gates for doorways and security locks.

Cannock Gates offers the UK's largest range of wooden gates and wrought iron style gates and railings. The extensive range includes garden gates, side gates, drive gates, estate gates and field gates in over 750 standard size/style combinations. A bespoke service is also offered, meaning you can choose a style and size of gate to perfectly suit your home.

Most pairs of gates are suitable for automation, with a choice of above and below ground hydraulic systems and electromechanical systems, some designed for easy DIY installation. An installation service is available for gates, railings and automation.

Operating for over 25 years, the Cannock Gates ethos is based upon traditional manufacturing methods and skilled craftsmen.

All Cannock Gates timber products are PEFC certified and are produced in ways which do not damage ancient forests, harm wildlife or jeopardise the future of the people whose lives depend on the forest.
